

## COUNTING THROUGH A DECADE

Example using the 3<sup>rd</sup> decade:

20, 21, 22, 23, 24, 25, 26, 27, 28, 29

We need to visually support the counting:

- Use number lines (progress to covering). See video.
- Use number cards. See video.

## COUNTING ACROSS A MULTIPLE OF TEN/BRIDGING A DECADE

This is when you change to the next decade of numbers, for example:

29 30 31,    39 40 41,

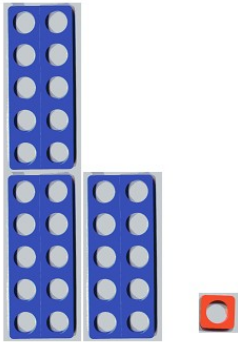

- Focus on one bridge at a time.
- Use Numicon to show what happens as you place another 1 shape with 29, you get 3 tens so 30.
- Practise saying number names using a number line to read them.
- Later cover using lift the flaps

T	U	T	U
2	9	3	0

  

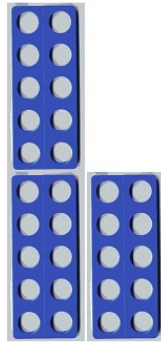

29+1 makes 3 tens

T	U
3	1

T	U
3	0

Now zero units
