

USING CALCULATORS/PHONES

- Practise entering numbers. Look at where the +, -, = signs are
- Start with basic + sums, eg 2+2, sums that the child knows the answer to. Use boxes to represent 'keys' and make a box for the answer

- Write out a work sheet and a flow diagram of what buttons to press.
- Move onto adding up longer lists, eg 21+32+15=

Once the answer is found make it with Numicon and mark it on a number line
