

Doubles

Start with doubles up to 10 (1+1, 2+2, 3+3, 4+4, 5+5)

Move slowly onto doubles up to 10+10=20. These are much harder but v useful. They need to be learnt by rote, 6+6 = 12.....to.....9+9 =18

Such sums are very useful as we move onto bridging 10

Look for doubles in real life.

Feel for two Numicon shapes in a bag that are the same to make a double.

You will keep revisiting this as you move through other targets.
